QUEBEC STORM.

1912

THE GLOBE, TORONTO, MONDAY JUNE 24TH. 1929.

STORM DATE. (MONTREAL) ABOUT 5P.M., SUN. JUNE 23RD. 1929.

HEAVY LOSS CAUSED BY CYCLONIC STORM IN MONTREAL REGION.

BARNS BLOWN DOWN AND AUTOS OVERTURNED ON HIGHWAYS...SEVERAL ARE DROWNED.

(Canadian Press Despatch)

MONTREAL, JUNE 23. Sweeping down from the LAURENTIAN MOUNTAINS shortly before 5 o'clock this afternoon a storm of cyclonic intensity crossed MONTREAL to dissipate itself on the south shore. In the terrific blow several lives were lost by drowning, and fatalities also ensued earlier in the afternoon as persons were driven to water in search of coolness.

The climax to eight sweltering days came as thunder crashed and lightning crackled and rain began to fall. Damage was heavy, innumerable telephone and other poles being blown down, barns turned over, automobiles upset on highways and fires started by bolts of lightning.

What damage was wrought in the LAURENTIANS and foothills or other districts outside of Montreal and vicinity is unknown owing to disrupted communication lines, but fragmentary reports reaching here tend to show that when a final accounting is made loss in property damage will run into large figures.

At a summering place, ST. ANSE DE VAUDREUIL, two men lost their lives when boats fell prey to the sudden fury of the storm, while two of their companions were saved.

Highway travellers from the north who managed to reach Montreal to-night told of heavy damage between LACHUTE and ST. EUSTACHE. Automobiles were seen overturned, while huge oak trees were uprooted and tossed around as if they were made of paper.
