CYCLONE, QUEBEC.

THE GLOBE, TORONTO, TUESDAY JUNE 7TH. 1927.

STORM DATE. P.M., MON. JUNE 6TH. 1927.

SMALL CYCLONE IN QUEBEC SMASHES HISTORIC TREES. WIRES ARE BLOWN DOWN AND TWO GIANT OAKS AT SPENCERWOOD FAIL TO WITHSTAND FURY OF TWENTY MINUTE GALE.

(Special Despatch to The Globe)

QUEBEC, JUNE 6. Ancient Capital and the whole district of QUEBEC was in the grip of a real cyclone this afternoon for 20 minutes. No loss of life was reported, but considerable damage was done to some of the public utilities companies, which saw posts torn down and wires put out of service.

Everything was in good shape this evening, it was learned, apart from a few rural telephone lines which were partly out of order.

At SPENCERWOOD some of the old giant oaks had a hard time to sustain the test of the storm, and two of them succumbed to the attack.

The wind blew at about 50 miles an hour for a short time.

The valley of the ST. CHARLES RIVER suffered considerably, roofs of barns being blown away. Damage was also caused in the surrounding district.
