BUILDING BLOWN OVER TALL TREE

Wreckage of Houses and Barns Strewn More Than Mile

(Canadian Press Despatch.)

Winnipeg, May 11.—Great damage to farm property, power transmission lines which supply the city of Winnipeg and telephone and telegraph lines resulted from the cyclone which swept over the districts of Sinnott, Lydia and Golden Bay, about thirty miles east of this city, yesterday afternoon.

The force of the storm tore farm buildings from their foundations, in many instances carrying the wreckage for more than a mile, levelled trees to the ground, and did great damage generally. On one farm near Sinnott five buildings were destroyed, with an estimated damage of $7,000. Farm machinery, caught in the full blast of the wind, was twisted; a fanning mill was picked up and carried one mile, and storm windows were torn from the houses and, along with pieces of woodwork, carried 700 yards and driven into the ground.

At another farm the wind picked up the barn and carried it clear of the foundations and smashed it into a scarcely recognizable wreck. A small smokehouse was carried 400 yards, over the top of 40-foot poplars.

MAY 13 1922.

CYCLONE WRECKS WINNIPEG LINES

Long Stretches of Telegraph Poles Levelled by Terrific Wind

(Canadian Press Despatch.)

Winnipeg, May 10.—Striking with extreme suddenness, a cyclone, travelling east, crossed the Canadian Pacific Railway System at Beausejour this afternoon shortly after 1 o'clock. The effect was felt for fully 30 minutes, according to the report submitted to the Canadian Pacific officials in Winnipeg later by the agent at Beausejour.

Long stretches of telegraph poles were levelled, and the wires of the Winnipeg Electric Railway and city of Winnipeg were entangled in a mass that fell to the ground. Steps were taken at once to send a relief train to the scene of the cyclone's wreckage.

No loss of life has been reported. As a result of the storm, Winnipeg was cut off from telegraphic communication with Eastern Canada.

SAVINGS AND PANS SCATTERED BY WIND

Victims of Manitoba Cyclone Lose Everything Except Their Lives

May 10

(Canadian Press Despatch.)

Winnipeg, May 12.—Five persons, victims of Wednesday's cyclone which struck eastern Manitoba villages, were brought to the hospital here today suffering from innumerable bruises and internal injuries. They are: S. Pitre of Lauderville, his wife and two daughters, and A. Pitre, a brother.

The family is literally penniless. Everything, even to the little money saved, has been blown far and wide, and there is not enough left of their home to start a decent kitchen fire. Kitchen utensils belonging to the family have been found two miles from their home.

A small cyclone is reported to have passed over Rosenfeld, Man., southwest of this city, last night. No casualties resulted, but slight property damage occurred. Several buildings were partially wrecked, including an empty house, which was torn from its foundations.

TORNADO

LYDIATT MAN
SINNOT MAN MAY 10 1922 1300 LST

DESCRIPTION: storm moved from SW to NE from Lydiatt through Milner ridge. Path length approx. 16 miles, passed 1 mi E of Sinnot and almost directly over Lydiatt. Milner and Golden Bay districts also affected. Path width 100 yards at Lydiatt, widened northward to about 1 mile. AT SINNOT a grear black funnel cloud appeared suddenly in the sky and almost simultaneously the mighty wind struck the district. AT LYDIATT " at 1240 I noticed a black funnel shaped cloud in the southwest. The cloud was still in the sky, but almost ¾ mile from the station it struck the ground and swept north in the direction of the station. It caught everything in its path and carried it high in the air. There was a terrific roar when the station was struck.
DAMAGE: transmission lines to both Lac Du Bonnet, and Pointe du Bois down and power to Winnipeg completely cut off for 3 days. Transmission towers were down for 1 mile and twisted into fantastic shapes. A steam plant provided Wpg with a small emergency power supply. House and barns were wrecked along the path and portions found in the tops of trees. A house at Lac du Bonnet was lifted intact and carried 100 ft. Four in the house were injured and hospitalized. A log house completey disappeared.
