airport security procedures but stressed that all countries must co-operate to improve airport security.

"I think that we have got to address this in a co-operative, concentrated and comprehensive way, and we have got to put in place high standards which will be universal and uniform throughout the world."

Earlier, however, in an interview with Broadcast ... to make the changes permanent.

"If you hand inspect every piece of luggage tht goes on a 747, you are looking at a 3½- to four-hour boarding time period," he said.

"And you can imagine what that does at an airport and especially some of our busiest airports. So we have that physical problen that we have to contend with."

Twister's touch damages barn

Frank Smerdely surveys some of the $40,000 damage wrought by a tornado that briefly touched down on his acreage near Cochrane. The funnel-shaped cloud, spun-off by a severe windstorm Friday evening ripped the roof off his barn and dumped it into a nearby field. His wife Yvonne said she was shocked by the event which sent heavy, clay roof tiles whizzing through the air as she scrambled to cover geraniums in their yard.
