in connection with one of four suspected homicides they've been investigating in the Ponoka area.

Wilson William Nepoose, 41, was arrested Saturday on the murder charge and appeared in Westaskiwin provincial court Monday. He did not enter a plea and was remanded to Friday.

Police allege Nepoose is responsible for the death of a woman whose body was found June 25 at the edge of a gravel pit northwest of Ponoka.

Despite the arrest, police still don't know the name of the woman, said Staff Sgt. Don Jumaga of Ponoka RCMP.

body, police have said.

Jumaga declined to say what led police to Nepoose. "It was some good investigating."

In Hobbema, on the Samson Indian Reserve about 20 kilometres north of Ponoka, Nepoose's name was familiar to several people strolling in the town's shopping mall.

One man, who wouldn't give his name, said Nepoose is a Samson Indian and has been unemployed for years.

Police, meanwhile, are still trying to

Divers searched the Battle River Monday for clues while other investigators conducted interviews and sifted through paperwork.

"We've had few leads," said Jumaga.

The woman had a glass eye and police are trying to trace its source.

The man was wearing a T-shirt that included the phrase Queen's Hotel, Qu'Appelle, Sask., and police are trying to follow up on that lead.

An autopsy has determined that a fourth person — Cora Lynn Crier, 2½, of the Samson Indian Reserve — died

Twister caught in act

SD July 13/86

By Bob Warwick
(Herald Banff bureau)

COCHRANE — Most people never get a close look at a tornado funnel. Grant McNabb has seen two, and Sunday he he got his camera into gear to catch the action.

McNabb was nursing an attack of laryngitis on the family ranch Sunday and just for something to do he started to watch closely as a thunderstorm rolled in.

After the rain stopped he went out to check the rain gauge in the yard and spotted the funnel at the south end of the Wildcat Hills.

In 1981, McNabb, an industrial engineer with the city of Calgary, was driving on Memorial Drive and saw one of similar size, but that time he didn't have a camera handy.

This time it was different, although he did have to scramble to find fresh film. Using a zoom lens, he shot from about 1.6 kilometres away.

The twister caused no damage and the field was vacant of livestock.

From the time the funnel began to form in the clouds until it disappered was about five minutes, McNabb said.

A weather briefer with Environment Canada said the twister was the third confirmed tornado in the last two weeks at Cayley, Stirling and Cochrane.

There was also an unconfirmed report of a funnel touching down near Airdrie, he said.
