# Flooding, Power Failure In Welland After Storm

A short in a hydro line on Louisa St., caused a power failure that blacked out the greater part of Welland yesterday.

The weather was blamed for the short, which affected the No. 8 sub-station on Southworth St., and No. 3 and 7 substations on the west side. The extreme north and south sections of the city were not affected but the rest of the city suffered a power failure that lasted, in some areas, an hour and ten minutes.

Acting mayor Albert Saltarelli, said the heavy rainfall caused general flooding throuhout the city. Even though the city is working with a skeleton crew, due to holidays, enough men were available to operate all drainage equipment and any existing trouble spots should soon be cleared up.

There was some hail in sections of Pelham Township Saturday but a growers' spokesman said it was not severe enough to damage the cherry crop.

The torrential rain of Saturday afternoon accompanied a "moderate" tornado that flitted capriciously around the Niagara Falls Boulevard area just across the frontier.

A number of structures were overturned and one home lost part of its roof in the storm. The car of a motorist forced into a ditch caught fire, but the driver escaped injury.

A tornado warning existed in Erie and Niagara counties until mid-afternoon.

One of the bizarre episodes during the storm was the tornado's propulsion of a wheelbarrow 500 feet through the air to a landing, with handles imbedded, in the roof of a dwelling.

General damage was reported light and there were no casualties.

West Side Fire Hall reported a high temperature yesterday of 74 degrees, and an overnight low of 67. Our eight a.m. reading today was 72 degrees and at noon the temperature was a pleasant 77. There was .84 inches of rainfall recorded in the past 24-hour period, while .89 inches fell on Saturday.

### ACROSS ONTARIO

The Toronto weather office reported 1.53 inches of rain in the city during the weekend, 1.21 inches of it between 8 a.m. and 8 p.m. Sunday. This followed 1.94 inches Friday.

Windsor took the brunt of the rain as a severe thunderstorm late Friday and early Saturday caused flood damage and power failures in some areas.

Power was off for 1½ hours between Windsor and Amherstburg, 17 miles to the south. At least two houses were struck.

At London, the airport reported steady rain from 4 a.m. to 2.30 p.m. Sunday for a total .93 inches.

Recently resurfaced stretches on Toronto's Don Valley Parkway caused motorists some trouble. Police said Sunday's rain made the Parkway "as slick as glass" and 15 minor collisions occurred in two hours.

Late Sunday, weather officials in Toronto and Detroit were tracking a small tornado, or severe electrical storm, near Sarnia.
