CYCLONE, WEST OF APSLEY, ONTARIO.

THE GLOBE, TORONTO, FRIDAY JUNE 17TH. 1927.

STORM DATE. JUNE 1927.

TERRIFIC CYCLONE SWEEPS GULL LAKE.

OBSERVATION TOWER WRECKED, COTTAGES OVERTURNED AND ISLAND CLEARED OF TREES.

(Special Despatch to The Globe)

PETERBORO', JUNE 16. Reports coming in of destruction caused by a cyclone some miles west of (APPLEY) APSLEY show that its intensity was something entirely new in the history of the district. The GULL LAKE OBSERVATION TOWER, built on a high rock, rock-bolted, and guyed down at the four corners, was lifted bodily and carried 900 feet, some of the splinters of the building being found five miles away, while part of the provisions was found floating on COLD LAKE, three miles away.

Rocks bigger than a cook stove were torn out of the ground. The cyclone travelled in a narrow patch down COCKS LAKE, tore out the DAM leading into LOUCKS LAKE, lifted NED WILSON'S cottage and deposited it right side up some distance away. A small island in COCKS LAKE, directly in the path of the storm, was literally stripped clean of every bush and tree.
