TORNADO PROJECT SUMMARY SHEET

F=0 (also see QUE) ONT

1. DATE AND TIME: Aug 9, 1972

2. LOCATION OR PATH (attach map): OTTAWA (Vanty Pine Glen) 0697204

3. PATH LENGTH: ☐ NOT KNOWN ☐ <1 mi; ☐ 1-4 mi; ☐ 5-10 mi; ☐ 11-50 mi; ☐ LENGTH IF >50 mi

4. PATH WIDTH ☐ 5. TORNADO PART OF SQUALL LINE? ☐ YES; ☐ NO; ☐ UNKNOWN:

6. ANY UNUSUAL COLORATION? ☐ YES; ☐ NO; ☐ UNKNOWN

7. ANY UNUSUAL SOUND? ☐ YES; ☐ NO; ☐ UNKNOWN

8. IF ANSWER TO 6 OR 7 YES, ELABORATE;

9. LIST ANY ASSOCIATED PHENOMENA
(Such as hail, vivid lightning heavy rain, no rain, etc.)

10. TOTAL DAMAGE ESTIMATE $ U

11. TOTAL DEATHS ONE

12. TOTAL INJURED U

13. TOTAL HOMELESS U

14. LIST ALL REFERENCES

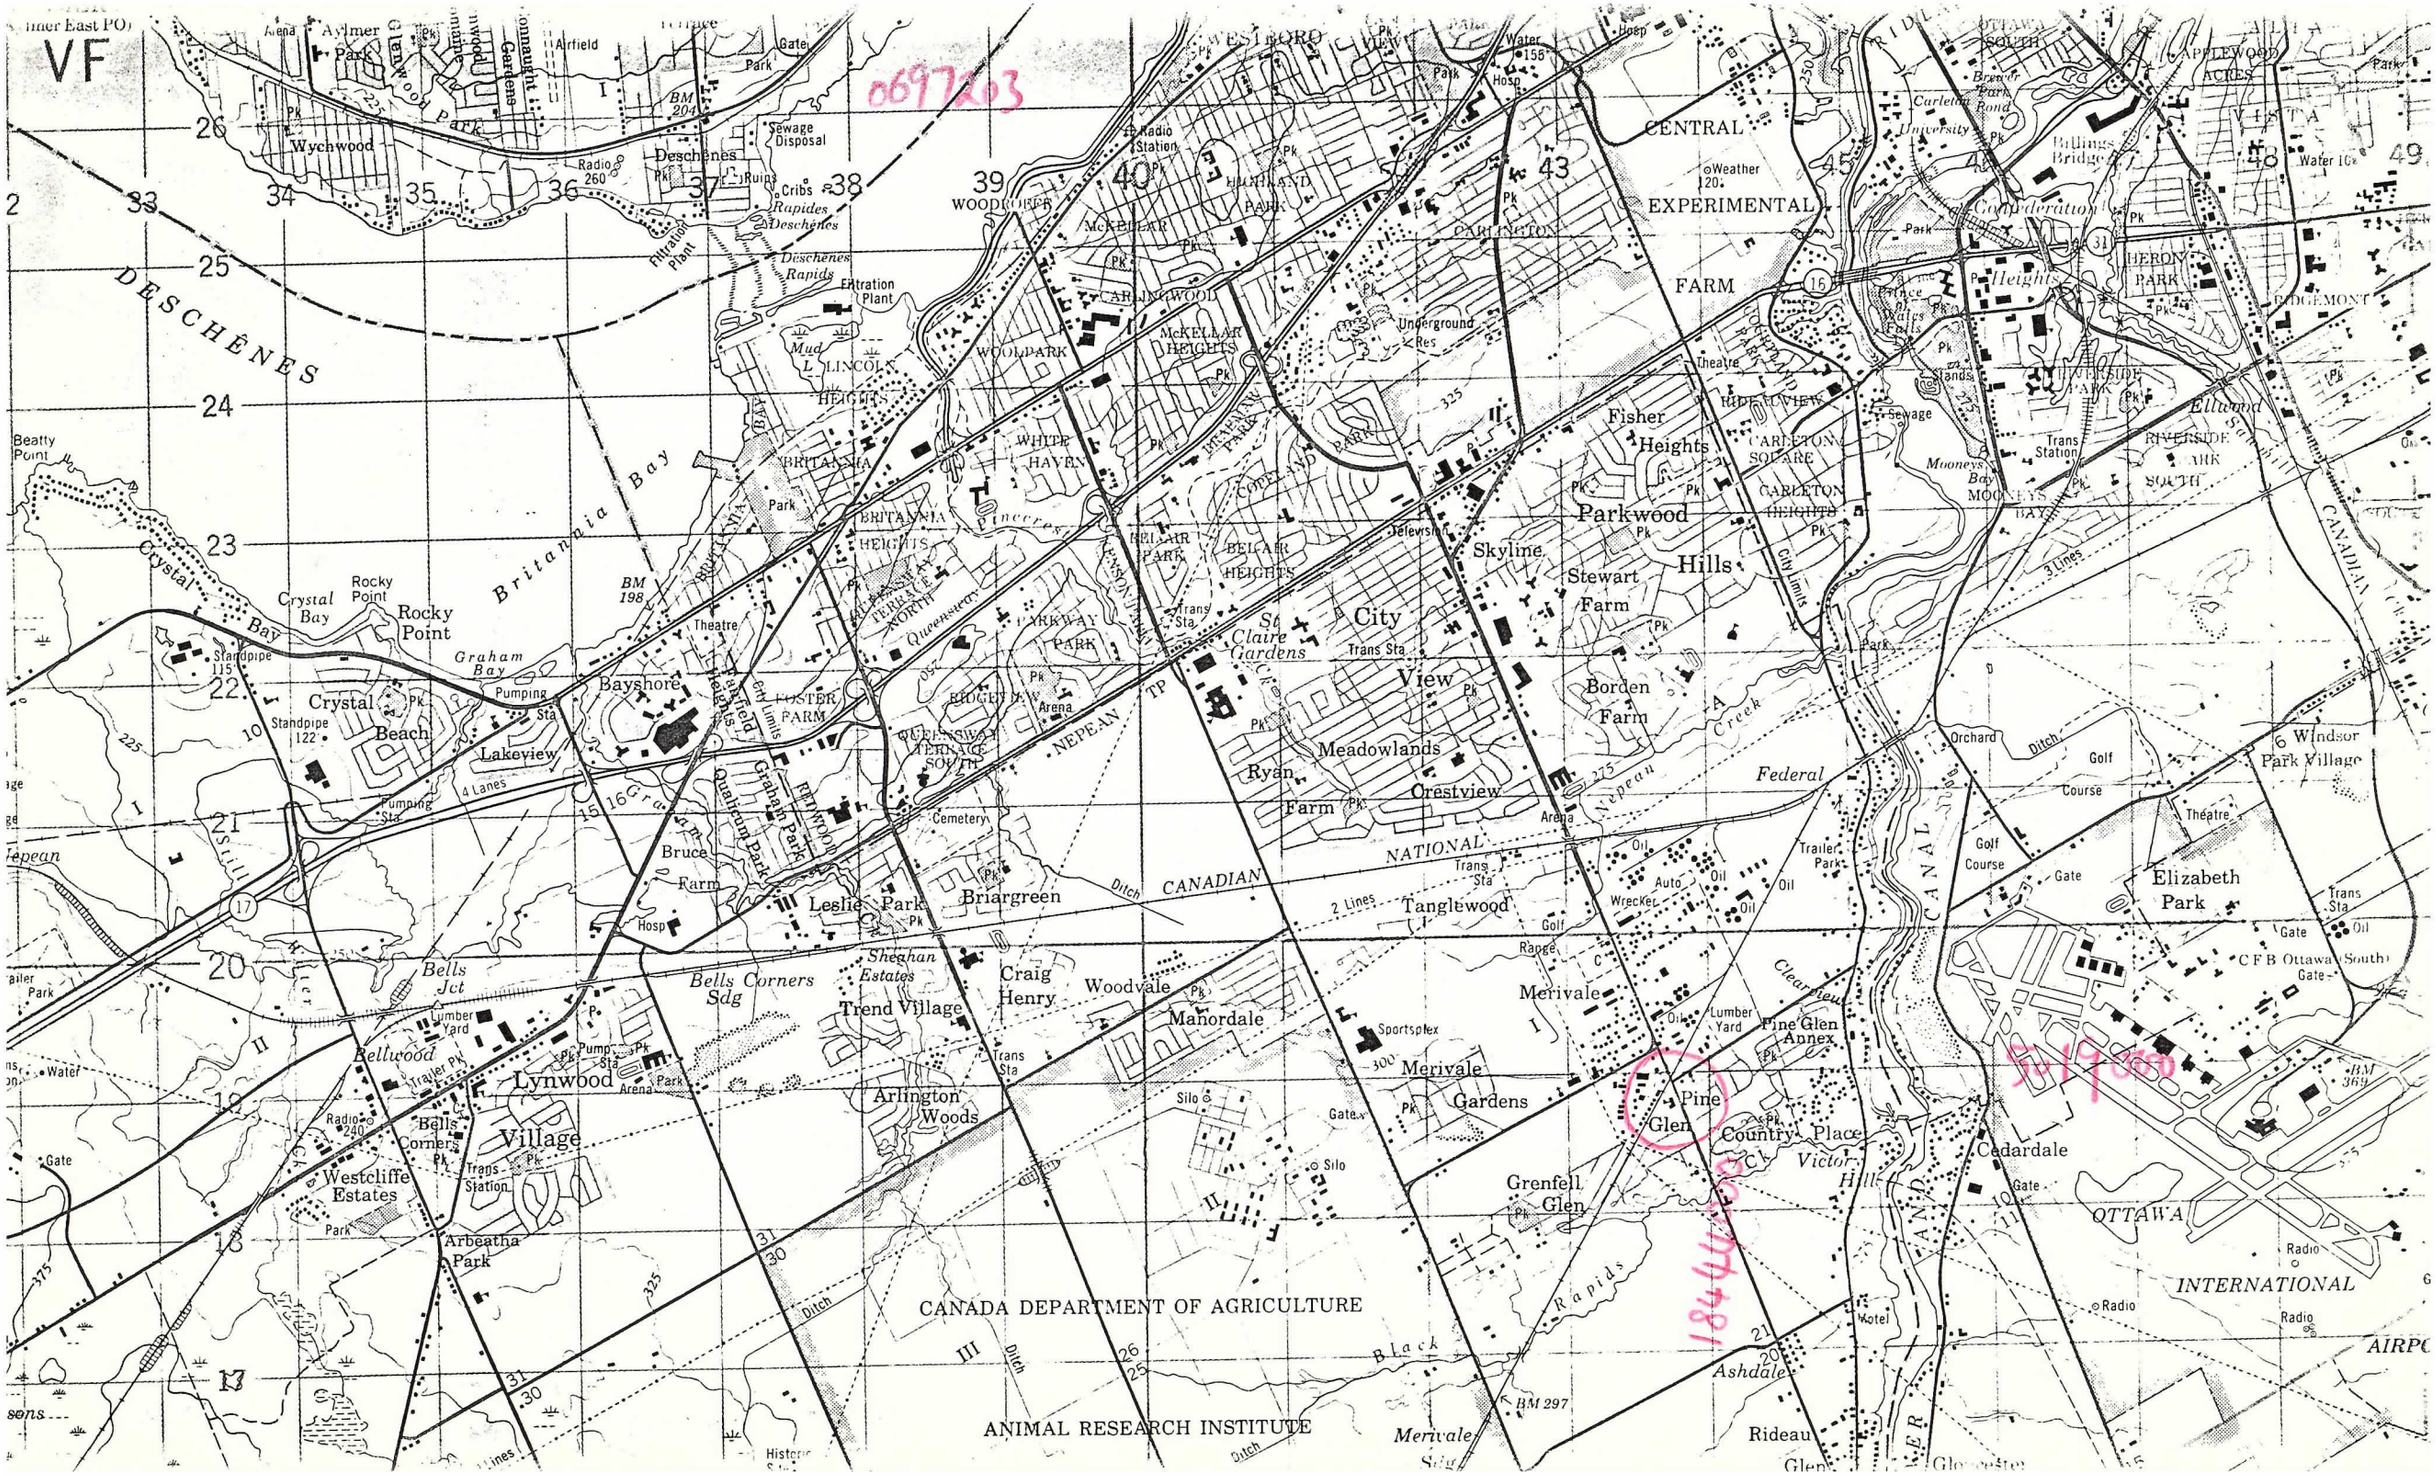

Le Soleil, Aug 10, 1972

Climatological Summary for Aug 1972, at Ottawa Intl Airport.

15. SUMMARIZE REMARKS PERTAINING TO (a) FUNNEL; (b) INTERESTING OR CAPRICIOUS EVENTS.

(a) "a classic funnel cloud formation"

(b) A shed was lifted 4 to 5 m into the air and a 14 year old girl was killed when it fell on her. Tree and hydro poles broken. Tent trailer lifted and a small aluminum boat thrown against a house.

ONT-QUE

Ottawa, Laurentides

A la pluie succède le vent

SAINT-CLEOPHAS (PC) — Une petite tornade a traversé hier un secteur de Saint-Cléophas, village des Laurentides, couchant les poteaux de téléphone et de l'Hydro et causant la mort de 12,000 poulets avec la mise en miettes d'un poulailler.

M. Yves Finlay, gérant du poulailler, a précisé que la tornade était passée vers 19h30, mais "tout était fini en quelques minutes".

En plus de soulever de ses fondations le poulailler de quatre étages de construction sommaire, la tornade a endommagé une maison, une érable, des silos à grains, et un hangar de ferme. Une centaine d'arbres dans un verger ont tout simplement été arrachés par le tourbillon.

A OTTAWA

Une autre petite tornade a frappé tout près d'Ottawa, vers 19h15 hier, dans Brookline.

Mais une adolescente de 14 ans a perdu la vie, quand elle a été écrasée sous un hangar soulevé de 12 à 14 pieds dans les airs par une autre tornade. Autour de Brookline, des arbres et des poteaux de téléphone et électriques ont été arrachés; quelque 400 maisons n'ont pas eu de services téléphoniques durant plusieurs heures.

Dans la région d'Ottawa, les dégâts les plus considérables sont survenus sur une ferme, où un hangar abritant 500 faisans a perdu son toit qui est allé s'écraser sur une maison de l'autre côte de la rue. Un grand nombre des oiseaux ont été tués.

Cette dernière tornade a aussi emporté une tente et une roulotte, ainsi que des dégâts mineurs à la ferme Pine Glen, au sud d'Ottawa. Le vent violent a soulevé une barque d'aluminium et l'a projetée contre une maison.

Dans plusieurs secteurs autour d'Ottawa on a été privé d'électricité durant quelque temps.

CLIMATOLOGICAL SUMMARY FOR AUGUST 1972 AT OTTAWA INT'L AIRPORT

During the month of August, the Ottawa Valley continued to suffer under the effects of a long wet summer. Total rainfall for the month was again well above normal, and during the first ten days threatened to be another record fall. However, the frequency and amounts fell off over the latter half of the month, and there were three days of welcome sunshine toward the end.

Temperatures averaged slightly below normal for the month, and two records were broken. On the 4th, the maximum of 65°F erased the record for low maximum of 66°F set in 1953; while on the 23rd, the minimum of 65°F replaced the high minimum of 63°F set in 1947.

Hours of bright sunshine averaged 1.3 hours below normal on a daily basis, partly due to the 19.75 hours of fog experienced. There was, again, an abnormally high occurence of thunderstorms, and a classic Funnel Cloud formation was observed on the 9th.

DEGREE DAYS (BELOW 65°)
