15. SUMMARIZE REMARKS PERTAINING TO (a) FUNNEL; (b) INTERESTING OR CAPRICIOUS EVENTS.

(a) OMNR employees at the chief rangers station on the Ottawa River at the city's west end got forewarning in the form of a double waterspout moving down river at midstream. "It came just before the hail.... There were two of them which seemed broader at the base than they were high. Then the two went together. Frank Bernadetti estimated the single spout to be 20 to 30 ft broad at the base and 15 to 20 feet high. It seemed to be travelling at about 25 mph.

(b) Trees uprooted, roofing taken off. Industrial building under construction was badly damaged
