Direction of Track: travelled eastward (from W)

Visual Description:

Path Width:

Fatalities:

Injuries:

SOURCE OF INFORMATION:

The Dauphin Herald, Mon. July 21/66

COMMENTS:

- Sound: "sounded like 1,000 freight trains coming, the roar was so loud."
- duration: 20 minutes
- trees felled at the 10-15 foot level or uprooted.

- Pine River: - rain and hail storm with strong wind struck at 0830 Z.
- the tornado left a swath ~~of~~ 1/2 mile down on the east side of Duck mountains.

"It appears the storm consisted of three streams. The main or centre stream was of high winds, rain, and hailstones. The left stream was of high winds and slashing rain. The right stream was of hurricane wind velocity and driving rain.

West of Pine River was hardest hit with heavy damages to farm buildings.

- roofs torn off sheds and granaries totally demolished, large barns misshaped, threshing machines overturned, and cattle injured by debris
