GUELPH & GALT ADVERTISER

WELLINGTON DISTRICT ADVOCATE FRIDAY JUNE 18TH 1847

Hailstones of a very large size fellat at LAWRENCEVILLE, 4 miles distant on Saturday last. Our informant states that some of the windows in the Wesleyan Church at that place were completely shattered by the force of the storm. We had nothing of the kind here.

Another person informs us that towards 10 MILE CREEK the storm was still more furious, prostrating fences in its course and uprooting trees. The roof of a barn was swept away

It is supposedthat the wheat crpps are severely injured by the pelting of the hail which is represented to have been of the size of eggs and plums and to have remained a considerable time on the ground. No doubt much injury was done throughout the range of the TORNADO.

WEEKLY WEATHER COMMENT JUNE 25TH 1847

The weather has been very various in this neighborhood for some weeks past during which we have had an immense fall of rain with some frosty nights. SNOW fell on the 14TH and 15TH.
