(Canadian Press Despatch)

MONTREAL, JUNE 21. Roofless is the home of MRS. A. DICK, MONTREAL NORTH, a heavy gust of wind the precursor to an electrical storm, scooping up the covering today, to deposit it in a vacant lot, 100 yards away.

Lashed into the semblance of a gale, the wind blew over a number of transmission poles and trees in the northern section of MONTREAL, resulting in a tie-up of traffic.

Black clouds swept over Montreal ISLAND, just before the wind was unleashed but only the north end of the island was visited by its fury. In this district many citizens were without light and the use of telephone following the fall of poles and resultant entanglement of wires.
