FIERCE STORM HIT MONTREAL; A MAN KILLED

A Cyclone Tempest Unroofed Houses and Felled Trees.

WIRES BLOWN DOWN

Many Sections of the City Without Light---Service With Outside Points Cut Off.

Montreal, Sept. 12.—Sweeping out of the northwest with cyclonic force at shortly after two o'clock yesterday afternoon, one of the fiercest and briefest thunderstorms of the season brought death to one man, injury to two women and a boy, ripped off roofs, felled trees and power poles, held up street car traffic for periods varying from ten minutes to one hour and left many sections of the city without house lights last night. Long distance telephone lines between Montreal and Ottawa were crippled, and the wires to Sherbrooke, Three Rivers and Quebec were put out of commission.

The storm, after its passage across the city, swept over the south shore and last night reports of big property damage began to filter into the city from sections across the river, but, due to the wires being down, the extent of the damage could not be ascertained. Lightning smashed the old chimney of a house in Ville St. Pierre, and in many parts of the city vehicles and pedestrians had narrow escapes from falling trees. Over half an inch of rain was recorded.

The one fatality of the storm was Alphee Plamondon, 26 years of age, of 94 Harmony street, who was fatally injured when he jumped from the running board of a truck in which he was riding on St. Ambroise street to avoid a wire which he saw falling in front of the truck. He slipped as he reached the pavement, and, in falling, struck his head on the curb of the sidewalk. He was admitted to the Royal Victoria Hospital a few minutes after three o'clock in the afternoon, and died twenty minutes later.

A falling tree struck the shelter in which three people sought refuge from the storm at the Country Club, St. Lambert, and crashed through the roof. Charles Phipps, a caddie, 12 years of age, of St. Lambert, suffered concussion of the brain; Mrs. Stella Caverton was badly shaken and bruised, and Miss Strachan suffered severe bruises.

ONE MAN KILLED IN MONTREAL CYCLONE

Havoc Wrought by Terrific Storm Which Struck Metropolis.

(Canadian Press)

MONTREAL, Sept. 11.—A storm of cyclonic proportions broke over Montreal and district around two o'clock this afternoon and lasted for only a few minutes, but in that brief time it had created a havoc that will require considerable money and time to repair. One man is dead and a number of people injured, while reports from the village of St. Hubert, on the south shore of the St. Lawrence, indicate that many houses have been seriously damaged.

Alfred Plamondon, a coal driver, is the dead man. He was endeavoring to avoid a live wire when he was precipitated from his truck and crashed to the ground, fracturing his skull.

The force of the storm ripped off roofs, felled trees and power poles, held up street car traffic for periods varying from ten minutes to one hour and left many sections of the city without lights tonight. Long distance telephone lines between Montreal and Ottawa were crippled, and the wires to the Maritimes, Three Rivers and Quebec were put out of commission.

Much Property Damage.

The storm, after its passage across the city, swept the South Shore and tonight reports of big property damage began to filter into the city from sections across the river, but, due to the wires being down, the extent of the damage could not be ascertained.

Lightning smashed several chimneys in the city and outlying points and in many parts vehicles and pedestrians had narrow escapes from falling trees. Over half an inch of rain was recorded.

A falling tree struck the shelter in which three people sought refuge at the Country Club, St. Lambert, and crashed through the roof. Charles Phipps, a caddie, 12, of St. Lambert, suffered concussion of the brain; Mrs. Stella Coverton was badly shaken and suffered severe bruises, and Miss Strachan suffered severe cuts and bruises.

Brief warning of the storm came at two o'clock, when black clouds scudded from the northwest. Those who paused to remark that it looked like rain were lost, for the storm broke swiftly. In driving sheets, to the accompaniment of vivid lightning and deafening thunder, the rain swept the city, and the rattle of hail joined the din of the thunder.

Montreal city suffered chiefly from the inconvenience caused by interruptions to transportation and other services, by streets being blocked and wires torn down, fallen trees and telegraph standards.

Housetop Lifted.

The violence of the wind made itself felt in one portion of the west end by lifting the roof of a house and resting it against the chimney. In the eastern portion of the city, the gale tore the sides out of two newly constructed houses, which finally came to the ground a few blocks away.

In the north end, the framework of a house under construction collapsed and three sheds were demolished.

In Montreal harbor, the storm also had a destructive effect, a number of vessels were in the process of loading merchandise when the storm suddenly burst upon them and before it was possible to cover the hatches, the heavy rain damaged a large amount of cargo. During the space of half an hour the water in the harbor rose two inches.

Hits Market Grounds.

The Chamb de Mars and Jacques Cartier Square, packed with farmers' carts for the Friday market, were swept by torrents that washed away the produce.

F. G. Webber, general manager of the Bell Telephone Company, stated that today's storm was one of the most serious from the company's point of view that had occurred for years.

Reports received from St. Hubert on the south shore, stated that the roadway was strewn with wreckage.

STORM DATE: PM. FRI. SEPT 11.

CYCLONIC STORM HITS MONTREAL

Roofs Ripped From Buildings and Trees Felled

MONTREAL Sept 11—(Canadian Press Dispatch)—A storm of cyclonic proportions broke over Montreal and district around 5 o'clock this afternoon and lasted for only a few minutes, but in that brief time it had created a havoc that will require considerable money and time to repair. One man is dead and a number of people injured while reports from the Village of St Hubert, on the south shore of the St Lawrence, indicate that many houses have been seriously damaged.

Alfred Plamondon, a coal driver is the dead man. He was endeavoring to avoid a live wire, when he was precipitated from his truck and crashed to the ground, fracturing his skull.

MUCH DAMAGE.

The force of the storm ripped off roofs, felled trees and power poles held up streetcar traffic for periods varying from 10 minutes to one hour and left many sections of the city without lights to-night. Long-distance telephone wires to Ottawa were crippled and the wires to the Maritimes, Three Rivers and Quebec were put out of commission. The storm, after its passage across the city, swept over the south shore and to-night reports of big property damage began to filter into the city from sections across the river, but, due to the wires being down, the extent of the damage could not be ascertained.

Lightning smashed several chimneys in the city and outlying points in many parts. Vehicles and pedestrians had narrow escapes from falling trees. Over half an inch of rain was recorded.

STORM AT OTTAWA.

OTTAWA. Sept. 11 — Nearly three-quarters of an inch of rain—exactly .71-inch—fell during a 40-minute electrical storm which struck Ottawa this afternoon, according to official figures issued by the experimental farm. The storm continued on its way to Montreal. Late this afternoon it was reported the residence of Albert Brown was struck by lightning, the peak of the roof and ridge boards being torn off and shingles scattered everywhere. Mrs Brown and her child were unharmed.

ONE MAN IS KILLED IN TERRIFIC STORM

Trees and Power Poles Are Levelled in Tempest at Montreal

THREE PERSONS ARE HURT

(Canadian Press Despatch.)

Montreal, Sept. 11.—A storm of cyclonic proportions broke over Montreal and district around 2 o'clock this afternoon and lasted for only a few minutes, but in that brief time it had created a havoc that will require considerable money and time to repair. One man is dead and a number of people injured, while reports from the village of St. Hubert on the south shore of the St. Lawrence indicate that many houses have been seriously damaged.

Alfred Piamondon, a coal driver, is the dead man. He was endeavoring to avoid a live wire when he was precipitated from his truck and crashed to the ground, fracturing his skull.

Trees Are Blown Down.

The force of the storm ripped off roofs, felled trees and power poles, held up street car traffic for periods varying from ten minutes to one hour, and left many sections of the city without lights tonight. Long-distance telephone lines between Montreal and Ottawa were crippled, and the wires to the Maritimes, Three Rivers and Quebec were put out of commission.

The storm after its passage across the city swept over the south shore, and tonight reports of big property damage began to filter into the city from sections across the river, but, due to the wires being down, the extent of the damage could not be ascertained.

Chimneys Are Struck.

Lightning smashed several chimneys in the city and outlying points. Vehicles and pedestrians had narrow escapes from falling trees. Over half an inch of rain was recorded.

A falling tree struck the shelter in which three people sought refuge at the Country Club, St. Lambert, and crashed through the roof. Charles Phipps, a caddie, aged 12, of St. Lambert suffered concussion of the brain. Mrs. Stella Coverton was badly shaken and suffered severe bruises, and Miss Strachan suffered severe cuts and bruises.
