Dear Sir:

Re: Our Insured - Allen Ford & Roy Ford (705)
Our File - 56-000753

Pursuant to our conversation on September 27, 1976, concerning the possibility of a tornado, I am attaching two statements obtained from my insureds, plus a picture of the garage which was blown down.

The exact location would be Part lot 12, C. 6, Twp. Belmont, Ontario.

This would be approximately 10 miles north-west of Harmora, Ontario.

In return, I would appreciate data received from your radar.

I thank you for your help, and I remain,

Yours very truly,

Michael Hale

FORD

Page one STATEMENT OF Ronald ~~Lawrence~~ Sept 24
I am Ronald Lawrence Ford and I live at RR #2
Havelock Ontario. I am 29 years old, marr
with four children and am self employed as
a contractor. I put the above premises up my
father for $125.00 per month. On Tuesday
September 23, 76 at about 2:00 p.m. I was
outside the house when I heard a great
clap of thunder. My wife came out and she
and I, a few minutes after the thunder the
wind really started to blow and rain and
I saw the tops of the trees blowing around
in circles. When I heard the roar, I grabbed
my two children and made them lie down
by the south wall and covered me and my wife
with a sudden debris of bricks and the
tile roof. The wind did not last more than
thirty seconds but it was the most violent
wind force. The wind knocked over the
garage, outhouse, couple of boats and carpor
and lifted the shingles on the south side
wall of the house. Water got in and damaged
the ceiling tile in the children bedroom
the storm is about 4 to 4½'. The damage to the
roof here about 25 years old damaged the roof
is about 3 years old. I have read the foregoing
statement and it is true to the best of my knowledge
and I have read it.

FORD

Page one. STATEMENT OF Ronald ~~Lawrence~~ Scott Ford

I, Ronald Lawrence Ford, live at R.R.#2, Havelock, Ontario. I am 29 years old, married with four children and am self employed as a contractor. I rent the above premises off my father for $125.00 per month. On Tuesday, September 23, 76 at about 2:10 p.m., I was outside the house when I heard a great clap of thunder. My wife came out and shortly after, a few minutes, got in the car and the wind really started to blow and I saw the tops of the trees blowing around in circles. When I heard this roar, I grabbed my two children and made them lie down by the south wall and myself and my wife followed suit. The whole storm did not last more than thirty seconds but it sure was wide with its path. The wind knocked over the garage, outhouse, garden tools and carport and lifted up the shingles on the south east side of the house. It also sucked in and damaged the ceiling tile in the children's bedroom. The storm is about 4 to 4½ feet. The shingles on the roof have about 2 squares damaged. The roof is about 3 years old. I have read the foregoing statement and it is true to the best of my knowledge and I have signed it.

Ronald L. Ford

along with doors, fan, sliding windows etc which I use in my business but which I had stored in the garage for storage purposes. Within a week I would have used them for my new storage which I was going to use for my own personal use. The garage was not painted and I would classify it as only partly finished. I was going to re-situate the garage near the main building and put 9 ft walls resting on it. I don't think the logs were damaged which were also to be used for the new storage. Besides the damage I also had a cave which has the floors and slats damaged. The cave is cedar slats, about 8 feet wide and was manufactured by Lobeck. The cave was in perfect order. The cave was in use for about 4 or 5 years and I paid around $200.00 at that time. The storage is 32 x 36 made of logs. The storage has no basement and to replace would cost $25,000 based on $20 per square foot. These two pages of statement are true to the best of my knowledge and I have read them.
