Classification: Possible Tornado
Date: Monday, September 19th, 1977
Location: Goderich, Huron – Perth Region

Assessment: F0
F-Code: NI
Explanation of Assessment: No damages were reported, only a photo of a funnel cloud 3/4 of the way down to the surface with the base obscured by trees.

SJS

Sept 12/77

Mike,

Here's a copy of the now famous Funnel Cloud over Goderich on September 19th. The white specks in the photograph are from the negative and are probably permanent. The view is from the Weather station grounds looking SSW over the lake.

Hope you enjoy it

Cheers.

Graham Campbell
