MEMO:Tornado started formed over lake and headed inland. Orchard trees uprooted and broken. An extreme heatwave preceeded the tornado with temperatures reaching 102½F in the shade. Many people died because of drowning (so many were going to the beaches), heat prostration, or heart attacks upon entering the water. Described as being white in colour.

THE GLOBE, TORONTO. FRI JULY 3, 1931. pp 1, 2.

15. SUMMARIZE REMARKS PERTAINING TO (a) FUNNEL; (b) INTERESTING OR CAPRICIOUS EVENTS.

(a) "The funnel-shaped cloud leading the storm caused a waterspout a half-mile from shore 50 feet high, which travelled from Grimsby eastward at a terrific speed". Accompanying it (over land) was a dust storm through which it was impossible to see.

(b) Orchard trees uprooted or levelled

Note. The heat wave was so intense the papers ran a daily list of deaths due to heat prostration. Many suffered heart attacks brought on by the shock of entering the water. ~~while swimming~~. 62 persons were drowned, were caused by drowning as people flocked to the beach or pools, others 29 died from heat prostration, during the period of a week.

Niagara District Hit Hard by Hurricane — Canoeists at Grimsby Escape Narrowly and Large Trees Give Way Before Gale

BUFFALO HANGAR STRUCK BY SQUALL

Fifty Persons Rescued From Niagara River and Lake Erie—Historic St. Luke's Church at Burlington Is Damaged in Storm

(Special Despatches to The Globe.)

Grimsby, July 2.—With only a few minutes' warning, a 60-mile-an-hour wind struck this district late this afternoon, lasting for a little over five minutes, but leaving a trail of damage in its wake. A peculiar-shaped white cloud rolled out of the west with startling speed. Accompanying it was a dust storm through which it was impossible to see. The storm seemed to divide just before it hit Grimsby, one part going toward the lake and the other going over the mountain.

In one orchard 20 peach trees were blown down, while in the next orchard several peach trees were uprooted. For some distance from these orchards no damage resulted, except limbs being blown from trees. At Grimsby Beach, however, big trees were blown over and orchards were hard hit.

Hydro Line Down.

A big oak tree fell across Park Road, bringing a Hydro 2,200-volt line with it, and causing a power shut-off of half an hour. The storm headed across the lake. An official temperature of 97 degrees was recorded today before the storm.

The funnel-shaped cloud leading the storm caused a waterspout a half-mile from shore 50 feet high, which travelled from Grimsby eastward at a terrific speed.

Immense trees were torn to bits at the northeast corner of Grimsby Beach. One tree 20 inches in diameter, standing in the yard of a cottage tenanted by F. Ray, 286 Glenholme

(Continued on Page 2, Column 5.)

(Continued from Page 1, Column 7.)

Avenue, Toronto, was blown down, falling across the roof of the next cottage, owned by Miss Adams, cutting the cottage completely in two. Mr. Ray had a narrow escape. He had been seated in a hammock attached to the big tree, and got out from under just as the tree fell. Another cottage, owned by Miss Bella Fairfield of St. Catharines, is twisted out of shape, with a large oak tree resting across the top of it. Twenty canoeing parties were rescued from the lake, with only a few seconds to spare.

Buffalo Hangar Damaged.

Buffalo, July 2.—Sweeping in with a wall of blinding dust, a brief but vicious wind squall early this evening did estimated damage of $15,000 to Hangar No. 1 and five planes at the Buffalo Airport, uprooted trees, blew down power lines throughout the city, and caused several small boats to capsize. The occupants were rescued.

The brick and glass north end of the airport hangar was unable to withstand the terrific pressure created by the squall, and toppled in. Despite frantic efforts of airport and flying service employees to pull planes into the hangars, five of the planes remained outside to be buffeted about by the wind.

The plane that suffered the most damage is owned by the Burgard Vocational School. It was outside the Colonial Airway's hangar when the storm struck. Employees of the hangar were unable to hold down the plane, and the wind blew it over. Both wings were smashed.

Fifty Are Rescued.

More than fifty persons were rescued from the Niagara River or Lake Erie during the storm. The Coast Guard reported saving forty-five alone. Sailboats upset, motor-boats became partly or entirely filled with water, rowboats were capsized. Three United States Government boats used to chase rum-runners, put out, and as far as is known, no drowning occurred.

Many of those saved were clinging to overturned craft. The list included the Banshee, sailboat owned by John McCreary Adams, Vice-President of the Sikes Chair Company. Mr. Adams and four members of his family were on their way to their summer home at Point Abino, Ontario. The boat upset and all five were clinging to the overturned hull, nearly exhausted, when a Coast Guard boat picked them up.

No rain fell in Buffalo, but vicinity places in Western New York reported heavy thunderstorms.

Trees Blown Down.

St. Catharines, July 2.—The windstorm that swept across Lake Ontario from the northwest this afternoon, reducing the temperature, did no considerable damage within the confines of the city. Along the Niagara escarpment and the lake shore road toward Niagara-on-the-Lake, a great number of trees were shattered by the wind, and on the outskirts of the city some orchards suffered and shade trees were wrecked. Within the city a light rainfall following the high wind rendered weather conditions much more bearable.

Historic Church Damaged.

Burlington, July 2.—Much damage was caused by a high wind, which was almost a hurricane, which accompanied a thunderstorm in Burlington and vicinity this afternoon. The greater damage was done to the historic church of St. Luke's. Two oak trees crashed down on the roof of the edifice, piercing it in several places.

A gaping wind is protecting the east stained glass window, was broken and two lights above and below the window were torn off the wall. A small rose window above the chancel was also fractured. An iron support to the chimney was torn loose, while another chimney from the bishop's vestry was broken off flush with the roof. Electric wiring of the church was torn loose.

The largest hole in the roof is located over the organ loft, and it is feared that water entering through the hole may have injured the organ. Some of the wood panelling in the interior of the church is splintered. The damage will reach several hundred dollars. Four locust trees at the west end of the church were blown down. Telephone and power lines also were down.

Heavy Rain in Barrie.

Barrie, July 2.—Citizens tonight looked forward to a restful night after spending two sleepless nights owing to the heat. Shortly after 2 o'clock this afternoon the sky became clouded, and within half an hour heavy rain followed, bringing with it cooler weather. Earlier in the day the mercury hovered between 95 and 100 degrees.

Tragedy at Burlington.

Burlington, July 2.—Harry Male, 7 Roxborough Avenue, Hamilton, died while he was bathing at Station 28, Hamilton Beach, this afternoon. He was accompanied by his wife, and suddenly he was seen to wave his arms in the air as though he was in distress. A bystander, whose name could not be obtained, went to the rescue of the sinking man, and brought him to shore. Medical assistance was summoned, as was Chief Constable Smith, who worked over the man for some time before life was pronounced extinct. Dr. Mitchell and Dr. Weaver of Burlington were in attendance. The cause of death is given as heart failure. There will be no inquest.

Severe Storm in Stratford.

Stratford, July 2.—The blistering heat wave of the past three days, during which the mercury refused to drop below the 90-degree mark, was ended abruptly when a severe electrical storm broke over the city about 2 o'clock this afternoon. Relief from the heat was welcome, but before the storm had subsided at 4 o'clock it had grown equal in violence to the heat wave which had preceded it. A flash of lightning struck the high-tension wires just outside the city, and Stratford was without Hydro power. Service was not restored until after 4 o'clock, and in some parts of the city even later. Rain fell in torrents during the two hours that the storm lasted. Cellars were flooded in many places. Stores on Erie Street suffered considerable damage to goods displayed in their windows, the driving rain finding its way in at top and bottom. The Bell Telephone Company reported little damage, and telegraph wires were not affected. Trees and limbs were blown down. Lights in the part of the city opposite Queen's Park were not on at 9 o'clock tonight. Nearly 100 rolls of newsprint, each weighing about 800 pounds, were damage when water rose over a foot in the basement of the Beacon-Herald Printing Company. Drain pipes in the cellar backed up when the storm sewer failed to carry the load demanded of it.

Cooler in St. Catharines.

St. Catharines, July 2.—Happy relief from the severest heat wave in the history of St. Catharines came this evening with a violent northwest windstorm, which blew the heat away. Many prostrations occurred today, though not of a serious nature, the sun's rays during the morning and part of the afternoon, until the windstorm came up, being considered hotter than the previous days of the heat wave. Business because of the heat has been virtually at a standstill this week.

Storm Strikes Suddenly

Hamilton, July 2.—Relief from the heat came to Hamilton about 4.30 o'clock this afternoon, when the skies blackened and a wind of almost cyclonic force raged for 15 minutes, followed by a downpour of rain. The result was a drop in the temperature from the high of 96 degrees about noon today to 80 by early this evening.

The earth and hot city pavements had been cooled by the rain, and a refreshing breeze prevailed. The wind, however, did considerable damage about the city, but none of it was serious. Several trees were broken, a few chimneys on homes were damaged, and wires were blown down. Vivid lightning accompanied the strong wind and rain, and a bolt struck the Hydro substation on Dundurn Street, but did no other damage than rip a small area of plaster off the ceiling. Operators who were in the station escaped injury.

Citizens are thankful for the drop in the temperature, as the heat during the past two nights made sleep impossible for most persons, and tempers were becoming short and nerves ragged. Farmers also were thankful, as field work was interrupted by the hot spell, and fruit growers in the Niagara Peninsula reported they were not able to pick fast-ripening cherries as they could not obtain help.

Storm in Preston.

Preston, July 2.—A sudden rainstorm accompanied by a cyclonic breeze swept through the town today, causing the water to run curb-deep in the gutter and affecting the thermometer to the extent of 30 degrees. For the last three days this district has sweltered under a terrific heat, with the thermometer reaching the 110 mark, a mark which has not been equalled in the past 25 years. The storm this afternoon caused the mercury to drop to the 80-degree mark.

Civic Employee Overcome.

Galt, July 2.—Some relief from the heat wave came this afternoon with the arrival of a thunderstorm, after the thermometer had touched 99 in the shade. Hundreds last night slept in parks, and today a few plants were forced to send their employees home. Sam Fowler, a civic employee, was slightly overcome by the heat. A walk on Elgin Street was heaved by the heat.

Newspaper Takes Holiday.

Lindsay, July 2.—Because of the extreme heat this afternoon Carew's sawmill closed for the day. The Warder newspaper staff was released for two days because of the torrid temperature. A number of machine shops closed temporarily. Today the thermometer registered around the 100 mark.

Hottest Since 1921.

Brockville, July 2.—Not since July 4, 1921, has a heat record like that of Wednesday been set up locally, when 101 degrees was the official mark on a shaded Government thermometer on the property of G. G. Grothier, Government meteorologist. Searching back over his records, Mr. Grothier found that on July 4, 1921, a temperature of 101 degrees was rung up. During last night a drop of only 21 degrees occurred through the hours of darkness, when the coolest temperature was warm enough for a nice summer day any year. Today was another sizzler until about 3 o'clock this afternoon, when a cold-fashioned thunderstorm broke. The time the storm approached the mercury had risen to 96 in the shade.

London Factories Close.

London, July 2.—With the thermometer registering 98 degrees in the shade at noon, London again sweltered today, but in the afternoon the city was cooled by a heavy shower, and the mercury dropped back into the eighties. In a number of factories it was necessary to close down departments where girl employees were overcome by heat. Highway officials report that the heat has caused buckles in the pavement of No. 2 Highway between Windsor and London, though none is of a serious nature. There have also been heat breaks in the pavement of No. 3 Highway east of St. Thomas.

Eggs Hatch on Shelf.

Brantford, July 2.—One unusual heat note was recorded from Echo Place, a suburb. Six days ago a hen, disliking the heat, gave up sitting on a hatch of eggs. The owner placed the eggs on a shelf, out of the way. Today they hatched out, the heat having been enough to finish the job. The record today was 100 in the shade, compared with 102 yesterday. Coincident with the heat wave, Brantford coal dealers announced that they have absorbed part of the recent advance in price, but that the consumer will have to meet an advance by fall of $1.50, of which 57 cents is increased tariff and sales tax.

Relief in Renfrew.

Renfrew, July 2.—A change from the terrific heat which for two days and two nights has made life a burden to the people of the Renfrew district came this afternoon, when an electric storm developed. Considerable rain fell and a breeze began to blow. In a few minutes the temperature dropped several degrees. A number of prostrations occurred in Renfrew and vicinity, but no fatalities, and there took place a noticeable evaporation of water in the Bonnechere River and the upper lakes, where the town has erected conservation dams for power purpotes. There are signs indicating that another electric storm is coming.

Many Children Numbered in Toll Taken by Lakes and Rivers as Families Seek Relief — Toronto Boy Drowns While Fishing Near Bolsover

WORKERS IN OPEN SUCCUMB TO RAYS

Shock Is Fatal to Sault Bather—Clothes of Unidentified Man Found at Grimsby — Lindsay Girl Rescues Child at Coboconk

(Special Despatches to The Globe.)

Lindsay, July 2.—George Porter, 5 years old, of Toronto, slipped and fell off the dock while fishing at the canal, about two miles west of Bolsover, and was drowned in thirty feet of water. His body was brought to the surface within an hour by John Cowie, a canal official. With his mother and father and a party from Toronto, the boy was fishing in the canal. Whether he stumbled or suffered a touch of yesterday's sun, is not known, but he fell into the canal as he was walking along in front of his father. Immediately his father dived for him, but was unable to effect a rescue.

Another drowning at Coboconk was averted when Miss Sadie Tebbutt of Lindsay jumped into the water to rescue a child of about 3 years of age who had got out beyond his depth. She had gone to Coboconk on a holiday. With Miss Kathleen Wakelin, also of Lindsay, she noticed the youngster go down for the second time, and jumped to the rescue.

Lakefield Child Perishes.

Peterboro', July 2.—Betty McCracken, 4-year-old daughter of Mr. and Mrs. Hilliard McCracken of Lakefield, was drowned yesterday when she wandered away from home and went bathing with several older children. The child waded in beyond her depth and went under. The body was recovered.

Entangled in Nets.

St. Thomas, July 2.—A tragic drowning occurred at the Village of Vienna Wednesday, when George Emerson, aged 11, was drowned going to the rescue of his brother Kenneth, aged 13. The boys had gone swimming in Otter Creek to cool off, and from the position of the body it is believed that George had become entangled in fishermen's nets and hooks.

Two Brantford Deaths.

Brantford, July 2.—The heat wave was broken this afternoon, leaving

(Continued on Page 2, Column 2.)

Toll of the Day

Temperatures dropped suddenly in most parts of Ontario yesterday, as black clouds raced across the Province, driven by a wind which in some places was almost cyclonic in its force. Relief was welcomed everywhere from the blast of heat which Wednesday claimed some thirty lives, and again yesterday took a heavy toll on land and water. Many drownings were included in yesterday's casualty list. Several persons died while at work, and prostrations are reported everywhere.

Fatalities reported yesterday included:

JOHN DOUGLAS MALLORY, 11 years old, drowned in swimming pool near Cobourg.

MARGUERITE FOSTER, 8 years old, drowned in "The Rapids," Grand River, at Brantford.

GEORGE PORTER, 5 years old, Toronto, drowned while fishing at Bolsover, near Lindsay.

MRS. MINNIE CAMPBELL ELLIOT, 46 years old, drowned at dock, Niagara-on-the-Lake.

CARLETON SHARP, 21 years old, died of shock on entering the water at Island Lake, Sault Ste. Marie, Ont.

JOHN EZOLOS, 28 years old, stricken with the heat on tobacco farm near Lasalette, Norfolk County.

GEORGE BANKWOOD, stricken near Ancaster, while driving home to Woodstock from Hamilton.

ERNEST GOETHALIO, 51 years old, Belgian, dropped dead on farm near Chatham.

ELIZABETH DORE, 67 years old, died in London, Ont., from effect of the heat.

JOHN KOBZA, 42 years old, Canadian National Railways employee, London, Ont., died of effects of heat.

JOSEPH CONNELL, 45 years old, died after heat prostration on farm in Glanford Township.

MRS. ANNIE CEARL, 121 Huxley Avenue, Hamilton, died in General Hospital, Hamilton, after heat prostration.

JOSEPH LATOUR, drowned while bathing near Coniston, Ont.

GEORGE EMERSON, 11 years old, drowned in going to rescue of his brother Kenneth, at Vienna Village, near St. Thomas.

BETTY McCRACKEN, 4 years old, drowned in river at Lakefield, Ont.

CYRIL HARRY MALE, 27 years old, 7 Roxborough Avenue, Hamilton, drowned while swimming in the lake.

UNIDENTIFIED BATHER, clothing found on beach at Grimsby, after storm, and not yet claimed. Believed to have been drowned.

PETER SCOLYK, 18 years old, drowned while swimming in Speed River at Guelph.

JOSEPH KEARNEY, 43 years old, Guelph, died after collapsing while at work on new Guelph-Brampton Highway.

WILLIAM HIVES, 18 years old, of Carsonby, drowned in the Ottawa River at Rockliffe.

RENE VILLENEUVE, 11 years old, Hawkesbury, Que., drowned in the Ottawa River, near his home.

HENRY JONES, 23 years old, Ramsayville, died of sunstroke while at work.

ALEXANDER SOULIERE, 50 years old, of Hull, died after prostration.

(2)

THE GLOBE, FRI JULY 3 1931

STORM DATE THUR JULY 2 1931

Ramsay

GLOBE, FRI

(Continued from Page 1, Column 5)

behind it a record of five deaths, two from heat and three by drownings. The rain which fell this afternoon in heavy volume will help the crops. The thermometer went up to 102, the hottest ever registered in Brantford. Today the third drowning was recorded, when Marguerite, 8-year-old daughter of Mr. and Mrs. E. G. Foster, was caught in the current of "The Rapids" in the Grand River, at the foot of South Market Street, and swept to her death a few yards below. Her little brother saw the tragedy but could not help, while the family dog, which was accompanying them, was unable to reach her in time. No inquest will be held.

The fifth death was recorded when John Fzios, aged 28, of Brantford, was stricken with the heat while working in a tobacco field on the farm of Charles Schooley, 4 mile from Lasalette, Norfolk County. He had been placed there through the local Provincial Government Employment Service about a week ago. The temperature was 110. He resided in Duke Street, Brantford.

Death in North.

Coniston, July 2.—The Wahnipitae River claimed a victim yesterday when Joseph Latour was drowned in sight of his four small children and several other bathers. Latour was an excellent swimmer, and the cause of his drowning is unknown. He swam across the river, about 250 feet, and after resting a few minutes on the other side plunged in to swim back to his children and housekeeper. He was swimming strongly, when suddenly he disappeared. There was no struggle and nothing to indicate that he was in trouble. The body was recovered this morning by Chief of Police Toohey of Coniston.

Shock Fatal to Bather.

Sault Ste. Marie, Ont., July 2.—Tonight the mercury, which stood yesterday afternoon at 97, on the hottest Dominion Day in 15 years, and the second hottest day in Algoma for 43 years, has sagged to 65, and the night promises to be chilly. People who yesterday visited the bathing beaches in thousands, and sped about the district in motor cars seeking relief from the record heat, are tonight appearing in furs, light coats and wraps. The heat claimed one victim, Carleton Sharp, a crippled Prince Township man, aged 21, who died of shock when he entered the water at Island Lake while in a heated condition. The highest point reached by thermometers today was 73 degrees at noon.

Woodstock Driver Stricken.

Woodstock, July 2.—George Berkwood died suddenly last evening near Ancaster while motoring home to Woodstock from Hamilton. Following complaints about his head hurting, he collapsed, the car swerving off the highway and crashing into a fence. Other cases are reported in the city of persons ill from the excessive heat, while animals, too, are faring badly, rabbit fanciers in many parts of the city and district reporting the loss of many valuable animals, with others ill from the heat. Another serious aspect of the hot spell is reported from just east of the city, where the strip of black pavement on No. 2 Highway, between Woodstock and Princeton, commonly known as the "Death Strip," is again showing signs of presenting a surface which, in wet weather, is likely to be the cause of similar accidents to those which have ended in fatalities in several instances. The heat is bringing to the surface the oil of the composition, which forms a greasy surface when wet.

Boy Drowned Near Cobourg.

Cobourg, July 2.—John Douglas Mallory, 11-year-old son of Frank Mallory, was accidentally drowned in a swimming pool on Colonel Massey's estate, about two miles east of Cobourg, late yesterday. The young boy and two little girls, Nora and Edna McMinn, were swimming in the pond in the afternoon. The girls decided to go further up the creek, and when they returned could see no signs of the boy and thought he had gone home. Mr. Mallory did not feel anxious about his son until later in the evening, when he instituted a search, and neighbors assisted. The body was found by Albert Prentice after the pond had been drained, and was later taken to the home of his father. The Coroner, Dr. G. M. Ferris, of Cobourg, investigated, but did not consider an inquest necessary. The boy was an only child. His mother died two years ago.

Bather Is Missing.

Grimsby, July 2.—Fears are expressed here tonight for the safety of an unidentified bather whose clothes were found on the lake shore after today's storm and have not yet been claimed.

Highway Worker Dies.

Guelph, July 2.—The intense heat wave of the past three days caused deaths and prostrations in Guelph today before a severe electric storm, which swept the city this evening, brought relief to citizens and residents in the outlying districts.

Joseph Kearney, 43 years old, Essex Street, Guelph, an employee of the Godson Construction Company, collapsed while at work on the new Guelph-Brampton Highway, near the Ontario Reformatory, and died a few hours after being admitted to the General Hospital. Frank White of Fergus, the other victim, was overcome while travelling on a motor bus between Guelph and Hamilton, and is in St. Joseph's Hospital in a rather serious condition.

Waters of the Speed River claimed the third victim in three weeks when the body of Peter Scolyk, Ukrainian, was found floating above the dam in Riverside Park this evening. Scolyk, 33 years old, went swimming yesterday afternoon and, although he failed to show up at his rooming-house last night, his absence was not reported to the police. The body was discovered by small boys who were bathing in the river, and it was some time before identification was made. Scolyk was employed in the Victoria Fish Market, and had only been in this country a few years.

Four Die Near Ottawa.

Ottawa, July 2.—Soaring temperatures were blamed for four deaths in this district today, bringing the two-day total to nine. Whether or not they could swim, thousands sought relief in the river. Two boys were drowned, and prostration resulted in the death of two men.

Not content with breaking a thirty-year record by reaching 99 degrees yesterday, the thermometer shot up to 101 early this afternoon. In the late afternoon, however, the temperature dropped 20 degrees as a storm swept through the Ottawa Valley. Two barns were blown down and another was partly destroyed when it was struck by lightning. The storm passed around the city, although a cold breeze moderated the heat. The dead are: William Hives, 18, of Carsonby, was drowned in the Ottawa River at Rockcliffe, Ont. Rene Villeneuve, 11, of Hawkesbury, Que., was drowned near his home, also in the Ottawa River. Henry Jones, 23, of Ramsayville, Ont., died of sunstroke while at work on a farm. Alexander Smithers, 80, of Hull, died of prostration.

At Quyon, Que., thirty miles from Ottawa, a gale blew down two barns owned by Victor McBain and J. J. Stanton. At Wyman, in the same locality, lightning ripped away part of the barn of J. Clavet.

Fred Gadsby Overcome.

St. Thomas, July 2.—(Special.)—One man was overcome by the intense heat. Fred Gadsby, former Canadian League baseball player, and had to be removed to the Memorial Hospital. He was stricken at his work. High winds this afternoon brought welcome relief from the humidity, the mercury falling about ten degrees.

Two Deaths in London.

London, Ont., July 2.—Two deaths were reported from the heat today, with scores of prostrations, and many persons in the hospitals. The dead are: Mrs. Elizabeth Dore, aged 67, of Wellington Street, and John Kobza, aged 42, of Clarence Street, a laborer employed on the Wellington Street subway of the Canadian National Railways.

Among the most serious cases in the hospitals are those of George Iversch of Maitland Street; Joseph Vytlawiecz, Simcoe Street; Thelma Sealdsett of Grand Avenue, and Colin Wilson, a gardener employed in Victoria Park. While walking on Richmond Street, near Kent, this morning, Mrs. William Cummings, Richmond Street, collapsed, and was removed to her home.

Bus Strikes Train.

Dunnville, July 2.—What might have been a serious accident occurred at 10.30 this morning in this town, when a Peace Bridge bus struck a Toronto, Hamilton & Buffalo train. The bus crashed headlong into the side of the freight car. A passenger coach in the train was derailed by the impact, but, although there were people aboard the coach and the bus, no one suffered more than a shaking up.

By Deluge of Rain And Violent Wind

Temperature Drop of Nearly 20 Degrees in Four Hours Noted by Observatory — Dust Storm Accompanies Squall

HEAT PEAK FOR DAY 97.8 IN AFTERNOON

A rumble of thunder, and the disappearance of Old Sol's burning rays yesterday afternoon, with the sudden descent of darkness over the city, broke the tension that for three days had held taut the nerves of suffering humanity. Black clouds and the first sprinkle of rain were heralded with joy for their bespoke relief in a period of exhausting torrid heat, which had continued since Tuesday morning. Over the city there swept a violent wind, breaking the branches of trees, banging doors and windows, raising clouds of dust, and ruthlessly attacking awnings and garden umbrellas. Then the skies opened and poured their cooling showers upon the baked pavements, the parched fields and lawns, and the blazing hot roofs of commercial and residential buildings.

Have No Fault to Find.

Caught in the downpour a few minutes after 5 o'clock in the afternoon, the business and shopping world of downtown Toronto made a desperate effort to reach home in a hurry. But there was little grumbling, though many a stenographer or clerk was subjected to a thorough soaking in the driving sheets of rain. There was sweet healing in the moisture, and the air clarified, bringing a cooler evening than had been enjoyed for several days. As the gale, acting as a monster merciful electric fan, whirled through the city to the accompaniment of rolls of thunder, and an occasional flash of lightning, harried citizens relaxed in anticipation of an unbroken night's sleep.

For many a household mother earth provided a couch during the misery experienced Wednesday night. Mattresses were carried to the garden and lawn, and families of even exclusive residential districts "camped out" in the open. Porches and terraces were hastily converted into bedroom suites, while in many a home the basement became a rendezvous for the family, gathering in the evening, and a popular location for setting up a cot for the night. Until long after midnight motor cars whisked families seeking air through open spaces and along shady roads.

The thunder storm of the afternoon was preceded by a terrific dust storm, which proved most disagreeable for pedestrians. While Toronto experienced a wind velocity of only 40 miles during the brief tempest, the Observatory reported that Buffalo had a wind velocity of 148 miles.

The hot wave peak reached yesterday was 97.8 degrees at 3.45 in the afternoon, which was one degree lower than the peak registered the preceding day. The maximum yesterday, according to the official report of the Meteorological Bureau, was 97. At 8 o'clock last evening the thermometer registered 78.8 degrees, a drop of nearly 20 degrees in a little more than four hours. The temperature of 78.8 degrees last night was 10 degrees less than that registered at 8 o'clock Wednesday evening, when the thermometer stood at 89 degrees.

A thermometer hanging in the shade outside of a private home at 4 o'clock registered 93 degrees, falling 10 degrees the first hour and five more degrees the second hour, following the storm. At 6 o'clock the thermometer stood at 78, a fall of 25 degrees in two hours.

Oshawa Also Relieved.

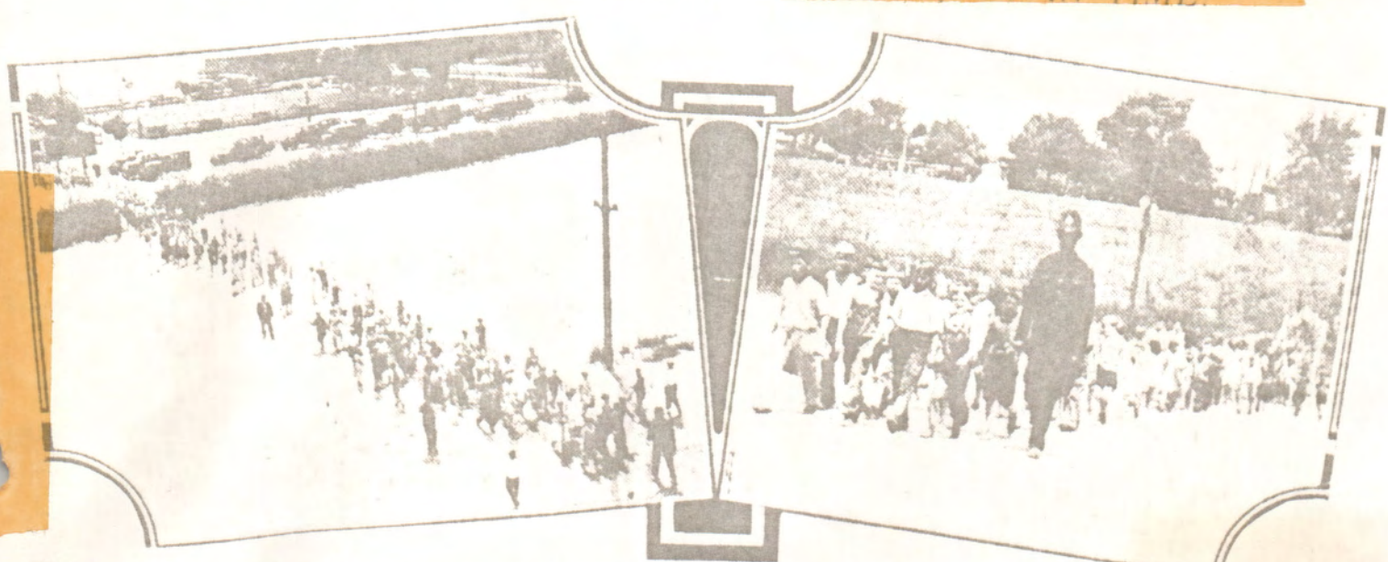

Oshawa, July 2.—(Special.)—Oshawa citizens were breathing a little more freely this evening following a thunderstorm which brought with it a generous downpour of rain and brought to an end the terrific heat wave under which the district had been sweltering for the last few days. Earlier in the day all records for heat threatened to be broken, with thermometers registering 100 in the shade, and hundreds of carloads of people went to the lake front in the search of a cooling breeze. It was between 5 and 6 o'clock when the storm broke to bring relief from the heat, and for two hours the rain fell steadily to cool the atmosphere.

The city's foreman of streets reports that the excessive heat has caused the concrete pavement on Simcoe Street South to swell and rise, being lifted above the normal level in some places nearly five inches.

A Little Cooler

The Weatherman, although predicting a cooler day today, would not promise a "cool day." The probs last night were: "Moderate northerly winds; fair and a little cooler."

FREE BATHING CARS START SERVICE—JUST IN TIME!

Thursday, July 2, was the date set some time ago by the authorities for the start of the free street-car service to and from the city bathing beaches for the convenience of those many youthful Torontonians who live some distance from the lake, and who might find the regular four-for-a-quarter tickets a bit too much for their purse. The inauguration of the service was most timely yesterday, with the city and district wrapped in a blanket of heat, and the kiddies turned out in force to emphasize their unstinted approval of the start of this yearly summer feature. As usual, the kids were "chaperoned" at Sunnyside by P.C. Harry Smith (422), whose watchful and kindly eye sees them safely from the cars and back again. The illustrations above show, at the right, P.C. Smith "herding" a carload of youngsters across the boulevard, at the left, the return, after a refreshing dip, to the homeward-bound cars.

Sudden Fury of Gale Imperils Sailing Craft, But Harbor Patrol Arrives in Time — Dinghy on Lake, Filling Rapidly, Carried Eight Miles

NEW CAR WRECKED BY FALLING TREE

(Staff Correspondence of The Globe)

Hamilton, July 2—Several boaters were in peril on the Bay and the lake this afternoon when a gale broke with sudden fury. Gordon Bates, son of Lieut. Fred Bates of the Navy League, who lives at 76 Edgewood Avenue, and two young girls and a chum had a narrow escape in Lake Ontario off the beach. They were in a sailing dinghy and about two miles out from the Beach piers when the gale hit them. Young Bates had lowered his sail and there was nothing to do but ride it out. Fortunately the craft kept afloat and was swept about eight miles to the eastward, when it was blown again inshore and landed near Crescent Beach, in the Winona district. The craft had shipped much water, and the members of the party were frightened. Residents of the Beach saw the small boat scudding before the gale, and calls for aid were sent to D. S. Kizer and Mort Corey, fishermen. By this time, however, the sailboat had drifted to a point beyond Van Wagner's Beach and was being carried inshore. Lee Lockhart and J. Eager put out in a rowboat, but the young sailors said their troubles were over, as they were in shelter and not in need of help.

The Harbor Patrol boat also had a busy time during the storm. Thomas Askew rescued three persons who were clinging to an overturned sailboat in the Bay off Wentworth Street. They were: Garner Erskine of 56 Tom Street and another man and the latter's son, whose names Mr. Askew did not know. Henry Askew, in another craft, rescued four persons clinging to a disabled sailing boat in the western part of the Bay. He did not know who they were, he said. Mr. Askew said that all life-saving equipment on the Bay should be under the control of the Harbor Board, with another patrol boat established at some station between La Salle Park and the Beach, so that rescues could be effected with the utmost speed.

The wind was said to have done considerable damage along the Beach. Trees were overturned, and power wires were blown down, which resulted in the power being off for three hours. A large tree was said to have been overturned at Crescent Beach, on the lake north of Winona, and fell upon and wrecked a new automobile that was parked near a building. The owner of the car was not known.

The Weather

Meteorological Office, Toronto, July 2—8 p.m.: Pressure continues relatively low over Ontario and the Southeast States, and high off the North Atlantic coast, also over the Western Provinces and Northwest States. Thunderstorms have occurred in many parts of Ontario and Western Quebec, where it has been extremely warm in more southern districts; highest temperature reported was 100 at Ottawa. It has been for the most part fair and comparatively cool throughout the West.

Forecasts.

Lower Lake Region—Moderate northerly winds, fair and a little cooler.

Georgian Bay—Moderate northwest winds, fair and a little cooler.

Northern Ontario—Moderate northwest to west winds, fair, a little cooler in southern districts.

Ottawa and Upper St. Lawrence Valleys—Mostly fair, but probably a few local thunderstorms, becoming a little cooler, with moderate westerly to northerly winds.

Maritime East — Moderate winds, fair and warm.

Maritime West—Moderate winds; mostly fair and warm; probably a few scattered showers or local thunderstorms.

Lake Superior — Moderate west and northwest winds; fair and somewhat cooler.

Manitoba — Moderate northwest winds, fair and comparatively cool.

Saskatchewan and Alberta—Moderate to fresh winds; mostly fair, with not much change in temperature; possibly a few scattered showers in southern districts.

Minimum and maximum temperatures: Dawson, 44-74; Aklavik, 46-74; Fort Simpson, 54-74; Fort Smith, 36-76; Prince Rupert, 54-60; Victoria, 54-70; Vancouver, 60-76; Kamloops, 50-74; Prince George, 48-66; Jasper, 36-72; Edmonton, 38-68; Banff, 42-66; Calgary, 46-60; Lethbridge, 49-53; Medicine Hat, 42-66; Swift Current, 42-66; Battleford, 44-68; Prince Albert, 40-62; Saskatoon, 47-62; Yorkton, 54-64; Moose Jaw, 47-64; Regina, 45-63; Brandon, 60-72; Winnipeg, 60-76; Kenora, 62-—; Port Arthur, 64-86; Cochrane, 66-76; Huntsville, 67-96; Parry Sound, 70-92; London, 72-96; Toronto, 73-97; Kingston, 74-88; Ottawa, 72-100; Montreal, 74-94; Quebec, 64-—; Saint John, 48-58; Halifax, 54-70; Charlottetown, 58-82.

Local Records.

(Standard Time)

Temperatures: 8 a.m., 87; noon, 93; 2 p.m., 79; 4 p.m., 80; 8 p.m., 78. Mean for day, 85; difference from average, 19 above; maximum, 97; minimum, 73.

Velocity and direction of wind: 8 a.m., 1 mile southeast; 2 noon, 4 miles south; 8 p.m., 7 miles north.

Barometer readings: 8 a.m., 29.47; noon, 29.47; 8 p.m., 29.43.

112 Lives Lost In 'Black Week' On Land, Water

GLOBE, MON JULY 6 1931

By JACK HAMBLETON
(Canadian Press Staff Correspondent)

It was a black week for Ontario. One hundred and twelve persons having died in the seven days ending last night, as the result of accidents or of heat prostration. And never before in the history of this Province has heat and water taken such a terrific toll.

Since last Sunday night, sixty-two persons were drowned in the Province. Heat deaths numbered twenty-nine in the same period. Automobile accidents were responsible for ten deaths. Aviation claimed six lives. Four persons died from other causes. And in addition, two bodies were recovered this week-end.

The terrific heat wave which reigned over the Province during the past four or five days was, of course, greatly responsible for the awful toll of death. But two major accidents took thirteen lives. Five were killed on Dominion Day in an aeroplane crash at Hamilton. Eight were drowned in the murky depths of the Ottawa River when a boat capsized. And hundreds have been injured this week in automobile and other accidents.

As tabulated by the Canadian Press last night, the week's fatalities were as follows:

Monday—One killed in aviation accident; three in auto accidents; three drowned; one struck by train.

Tuesday—Four dead in car crashes; one drowned.

Wednesday—Five in air accident; sixteen drowned; eight heat deaths; two in auto accidents; one in fall.

Thursday — Sixteen drowned; eleven killed by heat.

Friday—Seven drowned; eight killed by heat.

Saturday—Four drowned; two heat deaths; one killed in fall; one killed by auto.

Sunday—Fifteen drowned; two killed by heat.

Total deaths during week, 112.

GLOBE, THUR JULY 2 1931.

DROWNINGS IN NORTH SWELL DEATH LIST OF TORRID HOLIDAY

Toll Heavy as Crowds Rush to Water for Relief — Former Michigan Attorney-General Among Heat Victims—Child Dies in Swing Accident

GLOBE, THUR JULY 2 1931

Mingling stealthily with Canada's holiday-makers on the hottest Dominion Day on record, Death struck tragic and unexpected blows. The general rush to lakes and rivers was attended by many drownings.

It was a day of savage heat. All Central Ontario sweltered in an almost windless, debilitating day, in which even the Old-Timer had nothing to say.

Huntsville carried off the maximum-temperature honors with 101. Toronto, Ottawa and London were next, with 98; everywhere in the Ontario torrid zone the maximum was 90 or more.

Prostrations were numerous in all parts of the Province. A list of the fatalities follows:

GEORGE FRANCIS GOODMAN, 3 years old, St. Catharines, killed in rope-swing accident.

STEVEN KIDANOWSKY, 30 years old, drowned in Grand River, at Brantford.

REGINALD MARSDEN, 23 years old, drowned in Murphy's Creek, Burk's Falls.

CLARE RETAN, former Attorney-General of Michigan, died in the Border Cities of acute indigestion, superinduced by the intense heat.

DORIS SHEHAN, 8 years old, died in Windsor an hour after collapsing in street, of heat.

WAINO SKARINEN, 24 years old, baker, drowned in Goodfish Lake, near Kirkland Lake camp, while swimming.

JOHN ARAMPAA, 35 years old, married, drowned in O'Connell Lake while swimming.

THOMAS FOYLE, about 50 years old, of Cobalt, drowned in Bass Lake while swimming.

WILLIAM SEYMOUR, believed of Toronto, married, drowned in Nett Lake, north of Timagami, when boat carrying party of five to work on mining claims upset.

BARBARA BELL, 764 Weston Road, Toronto, stricken with a heart attack after bathing near Clarkson, dies in motor car on way to hospital.

FRANK LANG, 24 years old, 1626 Dufferin Street, Toronto, drowned while swimming in Humber River, near Woodbridge.

EMILE HANPALE, 33 years old, drowned while swimming in Long Lake, near Sudbury.

MIKE LINKIW, 38 years old, of Levack, drowned near that village, in Sudbury district.

EDWARD R. McINTOSH, 21 years old, Chatham, dies after heat prostration.

JOHN BABUESIEK, bridge-worker, drowned in Grand River, near Paris, Ont.

JOSEPH WINNES, 17 years old, of Huntsville, drowned in Four-Mile Lake, Widdifield Township, near North Bay.

BENJAMIN MALLOY, 22, drowned in Ottawa River, near Pembroke.

JOSEPH KARL, 33, drowned in St. Lawrence River, at Cornwall.

STAFF INSPECTOR DAVID McKINNEY, head of Morality Department of Toronto Police Department, expired after bathing at Keswick Beach, Lake Simcoe.

HARRY EDWARDS, aged 40, 257 Hiawatha Road, coach driver, died of heart attack.

JOHN BRESLIN, 26 years old, of Agincourt, drowned while swimming in Don River.

THOMAS RUTHERFORD, 27 years old, dies after motor accident near Hamilton.

IRENE HIGHAM, 7 years old, dies after motor accident near Hamilton.

MRS. JEAN PAULL, 27 years old, drowned in Ottawa River while bathing.

ANDRE LABELLE, 14 years old, drowned in Ottawa River.

JOSEPH MENARD, Pembroke, collapsed on way from work.

MRS. ELIZABETH BORE, London, died after being overcome by heat.

Heat Heaves Paving

St. Thomas, July 1.—With the temperature registering from 97 to 100 degrees in the shade, and running considerably over the hundred mark in the sun, St. Thomas citizens experienced the hottest Dominion Day

Tragedies Mark Day

(Special Despatch to The Globe.)

St. Catharines, July 1. — Dominion Day brought tragedy to the home of Mr. and Mrs. Thomas Goodman of Louth Street, this city. A rope swing had been hung at the front door on the porch, for the four little sons to
